

Germany

Bri Sandtner, Hamburg

I am Bri Sandtner, born in Hamburg, Germany. Since age 14 I have worked for equal rights, social justice, peaceful communication, and the well-being of all. As a social architect I am passionate about bridging economic and social systems through the use of alternative money systems, working with local economies, restoring the earth through sustainable farming, and supporting intentional communities and cooperatives. I am committed to transforming capitalism through my work with Gradido.net, “a way to worldwide prosperity and peace in harmony with nature.” I have a loving family, including one grown daughter, and – among other qualities - I value honesty, respect, and humor.

Carola Mohr, Prignitz

My passion is to contribute to the development of the world by evolving myself and helping others to do the same. It is also very important to me to penetrate mystical spaces and to be able to move freely from concepts.

I love to network, simplify, and support. This applies in particular to the areas of a new monetary and economic system (Gradido), Free Energy (Nicola Tesla), Learning and Education, Energetic Medicine, Ecological Gardening and Building, Communication (also with plants and animals), dissolution of individual and collective trauma, use of our human abilities to gain complete independence from aids of any kind, be they technical aids, medicines or anything else. I am the mother of an adult daughter and I live alone in Prignitz, Germany.
